

Ideation Phase

Brainstorming & Idea Prioritization

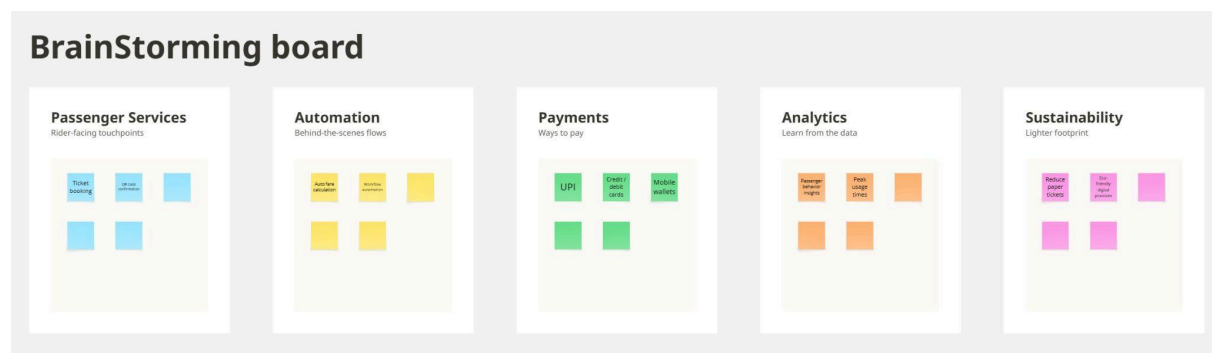

Date	
Student ID	23NU1A4221
Project Name	Metro ticket Generating system in ServiceNow
Maximum Marks	2 Marks

1. Idea Generation

Based on the identified passenger problems, the following ideas were generated:

No.	Idea	Purpose
1	Service Catalog Item for Ticket Booking	Allow passengers to request metro tickets through a structured booking form.
2	Source, Destination, Passenger Type & Number of Tickets	Capture the required journey and passenger details.
3	Automated Fare Calculation	Calculate the ticket fare based on the selected source and destination.
4	QR Code Generation	Generate a digital QR-based ticket after successful booking.
5	Digital Payment Integration	Support convenient payment methods such as UPI and cards.
6	Admin Dashboard	Provide booking and transaction information for monitoring and analysis.

2. Idea Grouping

The generated ideas were grouped into the following categories:

Category	Ideas
Passenger Services	Service Catalog ticket booking, Source, Destination, Passenger Type, Number of Tickets
Automation	Automated fare calculation, automated ticket generation
Payments	UPI and card payment integration
Analytics	Admin dashboard, booking and transaction data
Sustainability	Digital tickets, reduced dependency on paper tickets

3. Idea Prioritization

The ideas were evaluated based on Impact and Feasibility

Impact–Feasibility Prioritization Matrix

4. Final Selected Ideas

Based on the prioritization, the following ideas were selected for the project:

1. Service Catalog Ticket Booking
2. Automated Fare Calculation
3. QR Code Digital Ticket Generation
4. Digital Payment Support
5. Admin Dashboard

Final Decision

The project will primarily focus on simplifying metro ticket booking, automating fare calculation, generating digital QR tickets, and supporting convenient digital payments. An admin dashboard will provide basic monitoring and analytics. WhatsApp ticket booking and advanced analytics are considered future enhancements.
