Customer Problem Statements

PS-1: Long Waiting Time and Manual Ticket Booking

I am:

A metro passenger who uses metro services for daily or occasional travel.

I'm trying to:

Book a metro ticket quickly and conveniently by selecting my source, destination, passenger type, and number of tickets.

But:

I may have to wait in queues and spend extra time completing the ticket-booking process, especially during peak hours.

Because:

The ticket-booking process can involve multiple manual steps and **dependence on station staff**.

Which makes me feel like this:

Frustrated, delayed, and inconvenienced, especially when I am in a hurry.

PS-2: Fare Calculation and Payment Inconvenience

I am:

A metro passenger who wants to complete my ticket purchase without unnecessary complications.

I'm trying to:

Know the correct fare for my journey and complete the payment conveniently.

But:

I may need assistance with fare calculation and may not have convenient payment options during the ticket-booking process.

Because:

Fare calculation and payment can involve manual processes or separate steps.

Which makes me feel like this:

Uncertain, inconvenienced, and concerned about delays or incorrect fare information.

**Final Problem Summary**

Metro passengers may face long waiting times, manual ticket-booking steps, difficulty in determining the correct fare, and inconvenience during payment. These issues can lead to delays, confusion, and frustration, especially during peak hours. Therefore, there is a need for a simpler and more convenient ticket-booking process.
