

Project Design Phase-II

Data Flow Diagram & User Stories

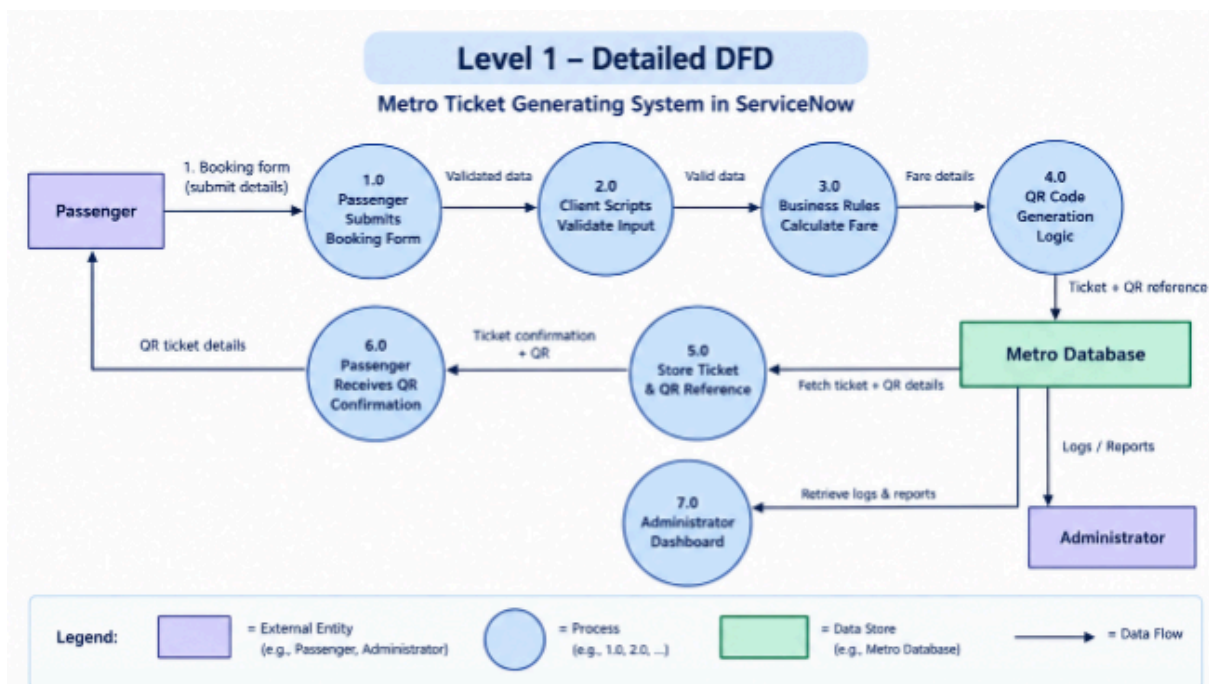

Date	
Student ID	23NU1A4221
Project Name	Metro Ticket Generating System in ServiceNow
Maximum Marks	4 Marks

Data Flow Diagrams (DFDs)

- A DFD shows how passenger requests (ticket booking) move through the ServiceNow catalog item, fare calculation logic, QR generation, and database storage.
- Level-0 (Context):** Passenger → ServiceNow Catalog Item → Metro Database → Administrator
- ServiceNow Catalog Item → Passenger (Confirmation + QR) .

- Level-1 (Detailed):** Passenger → Booking Form → Client Script Validation → Business Rule (Fare Calculation) → QR Code Generation → Metro Database → QR Confirmation to Passenger → Administrator Dashboard

2. User Stories

User stories define functional requirements from different perspectives.

User Type	Functional Requirement (Epic)	User Story No.	User Story / Task	Acceptance Criteria	Priority	Release
Passenger	Ticket Booking	USN-1	As a passenger, I can book a metro ticket by selecting source, destination, and passenger type.	Ticket is generated with the correct fare based on source, destination, and passenger type.	High	Sprint-1
Passenger	QR Code Confirmation	USN-2	As a passenger, I receive a QR code after booking.	QR displayed in portal and scannable.	High	Sprint-1
Passenger	Payment Mode Selection	USN-3	As a passenger, I can select UPI, Card, or Other as payment mode.	Payment mode stored in ticket record.	Medium	Sprint-2
Administrator	Transaction Monitoring	USN-4	As an admin, I can view ticket logs in dashboard.	Logs visible with filters.	Medium	Sprint-2
Administrator	Error Handling	USN-5	As an admin, I can detect failed or duplicate transactions.	Errors flagged in dashboard.	Medium	Sprint-3
