Problem – Solution Fit Template

The **Problem-Solution Fit** for the Metro Ticket Generating System focuses on identifying the difficulties faced by metro passengers during ticket booking and providing a digital solution that addresses these problems. The system simplifies ticket booking by allowing passengers to enter their source and destination, calculate the fare, select the required number and type of tickets, and receive a digital QR-based ticket through the Service Portal. By reducing manual effort, waiting time, and errors in fare calculation, the solution provides a convenient and efficient ticketing experience.

Purpose:

- **Reduce passenger waiting time** by providing a digital and streamlined ticket booking process.
- **Simplify ticket booking** by allowing passengers to enter journey details and generate tickets through the Service Portal.
- **Minimize fare calculation errors** through automated fare calculation based on source, destination, and passenger type.
- **Reduce manual effort** by automating ticket creation and processing using Business Rules and Flow Designer.
- **Provide secure digital tickets** through QR-code-based ticket generation for easier verification at metro stations.
- **Improve passenger convenience** by providing a simple, accessible, and user-friendly ticketing system.
- **Understand existing ticketing difficulties** and improve the overall passenger experience by addressing common problems such as long queues, manual errors, and inconvenience in obtaining tickets.

Problem-Solution Fit Template			
1. CUSTOMER SEGMENTS Who is your customer? Metro passengers, regular commuters	CS	6. CUSTOMER CONSTRAINTS What constraints prevent your customers from taking or using choices of solutions? Long queues, cash-only tickets	6. AVAILABLE SOLUTIONS What constraints prevent your customers from taking action in their choices of solutions? Long queues, cash-only tickets
2. JOBS-TO-BE-DONE / PROBLEMS What jobs-to-be-done (new to fit problems) did customer? Metro passengers need to buy tickets quickly to board. They want accurate fare calculation and cashless payments.	J&P	9. PROBLEM ROOT CAUSE What is the root cause that has helped? Manual ticket booking leads to delays fare exists.	7. BEHAVIOUR What does your customer do to address the problem and get the job done? Wait in line, carry cash, complain about delays
3. TRIGGERS What triggers customers to act? (i.e., seeing their neighbour installing solar panels, reading about a more efficient solution on the news).		10. YOUR SOLUTION Provide fast online metro ticket booking via ServiceNow catalog item extract auto fare calculations from \$70 payment mode; then QR code digital tickets. Solves metro passenger needs and fits with commuter behavior.	7. BEHAVIOUR What does your customer do to address the problem and get the job done? Wait in line, carry cash, complain about delays
4. EMOTIONS: BEFORE / AFTER How do/should customers feel after they have a problem a case and afterwards? I.e. lost, insecure, confident, in control, trust in your company & design.	EM		8. CHANNELS of BEHAVIOUR Official texting portal customers booking? Station ticket counters, waiting in line
