

PROJECT DEVELOPMENT PHASE

USER ACCEPTANCE TESTING (UAT) – RESULTS AND SIGN-OFF

Project Name: Metro Ticket Generating System in ServiceNow

1. UAT Execution Details

Parameter	Details
Project	Metro Ticket Generating System
Platform	ServiceNow
Environment	ServiceNow PDI
User Interface	Service Portal
Tester	Konathala venkata satyalakshmi

2. UAT Results

UAT ID	Scenario	Actual Result	Status
UAT01	Access booking service	Book A Metro Ticket opened successfully	Pass
UAT02	Select stations	Starting and destination stations selected	Pass
UAT03	Select journey type	Single/Return option worked correctly	Pass
UAT04	Enter passenger count	Passenger count accepted successfully	Pass
UAT05	Select payment mode	Payment mode logic worked correctly	Pass
UAT06	Fare calculation	Fare calculated automatically	Pass
UAT07	QR generation	QR code displayed successfully	Pass
UAT08	Submit booking	Request generated successfully	Pass
UAT09	View request	Booking details displayed successfully	Pass

3. Acceptance Criteria

The system is considered acceptable when:

- User can access the ticket-booking catalog item.
- User can enter valid journey details.
- Fare is calculated automatically.
- Journey type affects the fare correctly.
- Required fields are validated.
- QR code is generated and displayed.
- Booking request is created successfully.
- Booking details are available after submission.

4. UAT Conclusion

The Metro Ticket Generating System was tested against the defined user acceptance scenarios. The ticket booking workflow, dynamic fare calculation, payment-mode behavior, QR code generation, and request submission were successfully validated during testing.

6. UAT Test Evidence

The screenshot shows the 'Book A Metro Ticket' form within the servicenow interface. The breadcrumb trail is 'Home > Service Catalog > Office > Services > Book A Metro Ticket'. The form title is 'Book A Metro Ticket' with a subtitle: 'A metro e-ticketing system allows passengers to purchase and use tickets digitally, typically via a mobile app or website, eliminating the need'. The form includes several input fields and options:

- Starting From:** A required text input field.
- Going To:** A required text input field.
- Type of journey:** Radio buttons for 'Single Journey' (selected) and 'Return Journey'.
- No of Passengers:** A text input field with the value '1'.
- Amount for single journey:** A text input field.
- Quantity:** A dropdown menu set to '1'.
- Delivery Time:** '2 Days'.
- Action buttons:** 'Add to Cart', 'Save as Draft', and 'Order Now'.
- Required information:** Two buttons labeled 'Starting From' and 'Going To'.

The top navigation bar includes links for Knowledge, Catalog, Requests, System Status, Cart, Tours, and a user profile for 'System Administrator'. A search bar labeled 'Search Catalog' is also present.
