

PHASE 5 – PROJECT DEVELOPMENT

USER ACCEPTANCE TESTING (UAT) – TEST CASES

Project Name: Metro Ticket Generating System in ServiceNow

1. Objective

The objective of User Acceptance Testing is to verify that the Metro Ticket Generating System satisfies the expected passenger requirements and allows users to complete the metro ticket booking process successfully.

2. UAT Scope

The following functions are included:

- Metro ticket catalog access
- Station selection
- Journey type selection
- Passenger count
- Payment mode
- Automatic fare calculation
- QR ticket generation
- Ticket request submission
- Request confirmation

3. UAT Test Cases

UAT ID	User Scenario	Expected Result
UAT01	Access the metro ticket booking service	User can access Book A Metro Ticket
UAT02	Enter starting and destination stations	User can select required stations
UAT03	Select journey type	User can select Single or Return
UAT04	Enter number of passengers	Passenger count is accepted
UAT05	Select payment mode	Appropriate payment option is displayed
UAT06	Calculate ticket fare	Fare is automatically calculated
UAT07	Generate QR ticket	QR code is displayed to the user

UAT ID	User Scenario	Expected Result
UAT08	Submit booking	Booking request is successfully created
UAT09	View request details	User can view generated request and booking information
